The perfect system for Events

Sotelec IEvents SEV300 offers you everything you were missing so far for a successful event with a quick and easy set-up.

Ordering by smartphone

Easy to transport

Ordering from WIFI camera

Easy to set up

100% customisable event

External battery

What is IEvents SEV300?

SEV300 is an advanced solution to bring photo printing service to any event. The system is based on a compact server connected to a printer, to which customers connect to send photos from a web-app. It's that simple!

The IEvents system will receive and print images sent from the smartphones of the event attendees.

Connect a screen so that event attendees can view your numbered images and order as many copies as they wish.

Different print formats.

Main features

- > Lightweight and compact event photography system
- > No internet connection required.
- > No need to install applications.
- > Configurable from any device with browser
- > Carrusel.
- > Export of event photos
- > Multi-language interface.

Accessories

- > Hold your event anywhere without the need for a power outlet, with the external battery that lasts up to 4-hour battery
- > Offer professional images with the associated wireless camera, being able to make photocall or offering the professional photographs as a service.

Product catalogues

IEvents offers a huge range of customisations

BUSINESS MODEL

IEvents adapts to different business models, offering the following print streams:

1. Unattended flow
Photos uploaded by the user are printed on the fly.
2. Operator validated flow
Photos uploaded by users are added to a gallery. The user will have to ask an operator to validate his order to print his photos.

CUSTOMISABLE EVENTS

The operator will be able to customise the event 100% from any device with a browser connected to the event network:

- Enter the title of the event, the banner or the photo mask to be printed.
- Customise the layout of the Carousel, choosing how many images can be displayed on the external screen.
- Take full control of the event by regulating the number of images that can be sent from a device.

PHOTO GIFT PRODUCTS (iGifts)

It offers a wide variety of instant gift products, adding value to your images.
